

Grapefruit or Orange Feeders

Edible Bird Feeders

1. Cut a grapefruit or orange in half
2. Scoop out the insides, so that all you have left is the outer rind
3. Poke 4 holes in opposite sides of the rind
4. Thread a ribbon or string thru 2 of the holes, then thread another one thru the last 2 holes
5. Tie the ribbons together at their ends
6. Fill it with birdseed and hang by a window so you can see the birds enjoying it!
